Summary

Computer Science undergraduate specializing in full-stack development and applied machine learning, with hands-on experience building and deploying real-world applications. Strong foundation in software development, problem-solving, and database-driven systems, with 300+ DSA problems solved. Seeking a Software Development Engineer role to build reliable, high-impact systems.

Technical Skills

Languages	Java, JavaScript, Python
Frontend	React.js, HTML5, CSS3, Tailwind CSS,
Backend	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
Databases	MongoDB, PostgreSQL, Prisma ORM
Tools & Platforms	Git, GitHub, Vercel, Render, Neon
Core CS	Data Structures & Algorithms, OOP, DBMS, Computer Networks

Projects

IDRO — Intelligent Disaster Resource Optimizer *React.js, Node.js, Express.js, MongoDB, XGBoost*

- Architected a real-time disaster management platform that optimizes resource allocation across relief camps, improving coordination between response teams during emergency operations.
- Built an ML-based prediction module leveraging XGBoost to forecast camp resource requirements directly from incoming disaster reports, enabling proactive supply planning.
- Designed a priority-based ranking algorithm to automatically surface high-urgency locations, accelerating decision-making for response coordinators.
- Secured a Top 5 finish out of all teams at PU Code Hackathon for technical execution and real-world impact.

ERP & CRM Operations Management System *React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma*

- Engineered a full-stack ERP platform to manage customers, products, inventory, sales challans, and stock movements across a multi-role organization.
- Implemented JWT-based authentication with granular role-based access control for Admin, Sales, Warehouse, and Accounts user roles, strengthening data security and workflow governance.
- Developed an end-to-end sales challan workflow with automatic stock deduction and real-time stock movement tracking upon confirmation, reducing manual reconciliation effort.
- Deployed the production application using Vercel, Render, and Neon PostgreSQL, ensuring a scalable and reliable live environment.

TradeTrust — AI-Powered Deal Analyzer *React, Node.js, FastAPI, PyTorch*

- Built a full-stack AI application to evaluate second-hand electronics deals, combining computer vision and predictive modeling to guide purchase decisions.
- Implemented EfficientNet-B3 for image-based damage detection, enabling automated visual assessment of product condition.
- Trained a Random Forest classifier to generate BUY / HOLD / AVOID recommendations based on deal and device attributes.
- Designed a trust-scoring system to quantify seller reliability, improving buyer confidence in second-hand transactions.

Certifications

- Oracle Certified: Java SE 17 Developer
- Oracle Certified: OCI AI Foundations Associate (2025)
- NPTEL Elite Certification — Computer Networks and Internet Protocol, IIT Kharagpur
- TCS iON — System Administration & Server Operations Training

Professional Experience

TCS iON Vadodara, India
IT Support & System Administrator (On-call)

- Administered and monitored IT infrastructure and server systems during large-scale online examinations to keep systems running smoothly.
- Continuously tracked system performance and monitored server activity to identify potential issues and problems early, helping reduce downtime during peak examination periods.
- Worked effectively in high-pressure, time-sensitive environments, responding quickly to technical issues and helping maintain smooth examination operations.

Education

Parul Institute of Engineering and Technology CGPA: 7.8
B.Tech in Computer Science Engineering *Pursuing (Expected 2027)*

Maharashtra State Board of Secondary and Higher Secondary Education 74.83%
Higher Secondary Certificate (HSC) *2022 – 2023*

Central Board of Secondary Education 81.4%
Senior Secondary Certificate (SSC) *2020 – 2021*

Achievements

- Secured Top 5 position at PU Code Hackathon, competing against multiple teams on a real-time disaster-response system.
- Solved 300+ Data Structures & Algorithms problems on LeetCode, sharpening problem-solving and algorithmic thinking.
